

# KPHITE 7LP 3-6-9 PROGRAM

## “ON THE GROUND”

**KPHITE 7LP** – a systemic fungicide and bactericide that promotes plant health and vigor.  
Add 1-2 gallons\* KPHITE 7LP per grove acre.

### The Foundation of Your Annual Program

**KPHITE 7LP** provides the foundation of a successful year-round program. When applied on the ground at specific growing periods – March, June & September – the program excels at promoting root health for a stronger tree and higher yields, and battling disease like greening and phytophthora. KPHITE 7LP and the rest of the PFS program effectively support overall grove health and vigor.

Research and experience both show it's an important part of your program throughout the year.

### About Our Program

Plant Food System's citrus program is proven in the fight against greening and phytophthora. Our patented products are formulated to work together for citrus with a unique continuous-reaction process and molecule that provides the highest purity. Our program is trusted by growers and researchers for higher yields, quality fruit and effective disease control.

*\*Consider the higher rate for challenged greening groves.*
