

SIZER[®] XL

**Improve Fruiting Systemically With
Totally Soluble, Available P and K**

- **Reactor patent:** 4724132
- **Molecule patents:** 7887616, 8088191, 8193119, 8207089, 8216972, 8221516, 5736164, 5800837, 5925383, 5997910, 6338860, 6509041, 10040046, MX: 20992

SIZER[®] XL is 4 times MORE soluble and available to your plants than the closest competitor.

4-20-22 Urea, Dipotassium poly phosphate and phosphite combination

SIZER[®] XL is totally soluble, allowing it to work systemically throughout the plant. For crops, that is like getting a doctor's injection of pure Potassium and Phosphate to encourage consistent Fruit Set, More Fruit and greater SIZE fruit as well.

Powered by Unique Reactor Process

The key to **SIZER[®] XL's** effectiveness is its unique and reacted molecule. Nothing else is this soluble and immediately available to your plants, during fruit initiation and the fruiting (reproductive) process.

(Solubility Determines Availability)

Application Recommendations: For best results, apply from 2 quarts to 2 gallons per acre foliarly. SIZER[®] XL is compatible with most other tank partners, and has great crop tolerance to foliage and fruit.
